OXYGEN AND AIR REGULATORS

Oxygen and Air Regulators

Precision Medical Oxygen Regulators are intended to regulate oxygen flow from high-pressure oxygen cylinders. Our flexible and versatile line of medical oxygen regulators are available in five continuous flow ranges and two body designs. All of our oxygen regulators have gentle flow adjustment knobs to make changing the setting easy for patients. The oxygen regulators feature a built-in pressure relief valve for maximum safety, as well as a protected contents gauge. The unique design minimizes normal flow variation that occurs as tank pressure drops. Our oxygen regulators are available in CGA 870 Yoke Style and CGA 540 Nut Style cylinder connections.

Regulator Accessories:

EasyGauge Reg Oxygen Regulator

168715G

Measuring just 4.5 inches long and weighing 12 oz, the single body design makes it the ideal choice for oxygen users that prefer a gauge regulator over a dial regulator. Large numbers on the flow gauge make it easier to see the flow setting gauge. The knurled flow adjustment knob is easy to turn. For maximum safety, EasyGauge Reg Oxygen Regulator features a built-in pressure relief valve as well as a protected contents gauge. The low-force Viton yoke seal provides a superior tank-to-regulator seal. The unique design minimizes normal flow variation that occurs as tank pressure drops.

Features

- Available in 2 body designs, yoke or nut style
- Available in 2 flow ranges (0-8 l/min and 0/15 l/min)
- Compact and lightweight with the contents gauge on the front and flow gauge on the top
- Ergonomic flow adjustment knob
- Large easy-to-read numbers on the flow gauge provide better visibility of the flow setting
- The low force Viton yoke seal provides a better tank-to-regulator seal
- Unique design minimizes normal flow variation that occurs as tank pressure drops

Ordering Information

CGA Connection	Flow Rate	
	0-8 l/min	0-15 l/min
870 Yoke	168708G	168715G
540 Nut	165408G	165415G

Add "E" for an elbow for use with humidifier bottles ex: 168708GE

Gauge Guard Colorways	
-Y (Yellow)	
-R (Red)	
-B (Blue)	
-P (Purple)	
-K (Black)	

All regulator models come with the standard green gauge guard. To order a different colored gauge guard, add the suffix to the end of the part numbers above.

EasyDial Reg Oxygen Regulator

Precision Medical's EasyDial Reg Oxygen Regulator is our top selling oxygen regulator. The compact unit is only 4.25" long and weighs less than 8 oz. Each regulator model comes standard with a large, knurled flow adjustment knob to make flow adjustment simple for patients. EasyDial Reg Oxygen Regulator is designed for safety with a built-in pressure relief valve, as well as a protected contents gauge. The low force Viton yoke seal provides a superior tank-to-regulator seal and has an innovative design that minimizes normal flow variation that occurs as tank pressure drops.

Features

Available in 2 body designs, yoke or nut style

Available in 5 flow ranges: 0-4000 cc/min, 0-4 l/min,

0-8 l/min, 0-15 l/min, and 0-25 l/min

Low force Viton yoke seal provides a better tank-to-regulator seal

Ergonomic T-handle

Lightweight aluminum body and cap

6 gauge protector colorways

Contents gauge on the front and the flow gauge on the top

Oxygen & Air Diaphragm Regulators

OXYGEN AND AIR REGULATORS

870

504448

Precision Medical's brass diaphragm regulators provide a minimum flow of 240 l/min at a constant pressure of 50 psi with DISS male outlet. The oxygen regulators are available in CGA 870 Yoke Style and CGA 540 Nut Style cylinder connections. Diaphragm Air regulators are available in CGA 346 Nut Style cylinder connection and CGA 950 Yoke Style cylinder connections.

Features

Preset regulator at 50 psi

Available in 2 body designs, yoke or nut style

Available in oxygen or air
